Adobe Flash Professional is the professional authoring tool for Flash and for other web content authoring applications such as Dreamweaver CS3. The flash media player is built into the browser, and plays the SWF format, allowing it to be viewed on a wide range of devices and operating systems. Flash Media Player 10.2 Beta 5 is now available for download. You can visit the Flash Player 10.2 Beta 5 website or go to the flash.adobe.com Flash Player download site. You can also download Flash Player 10.2 Beta 5 directly from the Adobe Labs site. Adobe Flash Player 10.2 Beta 5 brings three new features to the release: full screen, HTML5 video, and HTML5 audio. Features

- Full Screen Now when you choose the full screen option, you can zoom into the full screen view, change the full screen color and darken the color to get a darker look.
- HTML5 Video HTML5 video has become increasingly popular because the data size is about 2x smaller than the standard WebM file format. It is now possible to browse video using the HTML5 technology. By default, the video is played in the mobile mode, so you need to select the desktop mode to enjoy videos.
- HTML5 Audio Web audio is also available through the HTML5 technology. Now, you can play the streaming or the non-streaming audio with the HTML5 technology. You can play the audio in the device's default audio player.

Flash MX 2004 is a professional flash animation tool for flash MX 2004. Flash MX 2004 brings a lot of new features and modifications to MX 2004. Flash MX 2004 incorporates several new features for Flash MX 2004, such as text objects, dynamic text, background flash effects, imported text and bitmap fonts, object properties, and the CSS3 property. This version also includes the following enhancements:

- 1) Refactored the engine to be even faster.
- 2) Refactored the user interface to be cleaner and more intuitive.
- 3) Re-designed the help tool to be more dynamic and easier to use.
- 4) Added the ability to create Flash Text Files, which support many of the properties that regular text files support.
- 5) Added the ability to preview imported images.
- 6) Added an export to SWF File option to the Actions Panel.
- 7) Added the ability to export any text object to a text field. 82157476af
