

[Remote Desktop Manager Enterprise 12.6.5.0 Key Download](#)

The screenshot shows the 'External Tools' dialog box in Eclipse IDE. The title bar reads 'avaJava.com Web Tutorials - Maven' and 'External Tools'. The main heading is 'Create, manage, and run configurations' with a sub-heading 'Run a program'. On the left, a tree view shows categories: 'Ant Build' and 'Program'. Under 'Program', several configurations are listed: 'mvn archetype~create', 'mvn eclipse~eclipse', 'mvn install' (which is selected), 'mvn package', 'mvn test', and 'Windows Explorer'. A filter text box is empty, and a status bar at the bottom left says 'Filter matched 8 of 8 items'. The main configuration area for 'mvn install' includes: 'Name: mvn install', tabs for 'Main', 'Refresh', 'Environment', and 'Common', 'Location: C:\dev\apache-maven-2.0.8\bin\mvn.bat' with 'Browse Workspace...', 'Browse File System...', and 'Variables...' buttons, 'Working Directory: \${project\_loc}' with similar buttons, 'Arguments: install' with a 'Variables...' button, and a note: 'Note: Enclose an argument containing spaces using double-quotes (")'. At the bottom are 'Apply', 'Revert', 'Run', and 'Close' buttons.

How do I install a project artifact in my local maven repository?
